08 TRUST INFRASTRUCTURE

AI Trust Profiles

Design a profile that connects an AI subject, intended use and the evidence relevant to it.

Research & architecture

Architecture & roadmap

net · EUR · plus VAT where applicable

WHO IT IS FOR

Enterprise architects, governance teams, platform builders and ecosystem partners.

THE QUESTION

A generic badge obscures what was actually examined. A trust profile connects the subject, scope and available evidence while retaining unknowns.

WHAT YOU CAN WORK WITH

01

Subject identity and intended use.

02

Claim-level evidence, dates and limitations.

03

Separate assessment and Verification states.

FROM STARTING POINT TO NEXT DECISION

1 Define scope

Identify the subject, organizational context and intended reliance.

→

2 Map authority

Connect evidence and permission to the responsible authority.

→

3 Validate

Validate the bounded runtime before any real issuance or execution.

SCOPE AND NEXT STEP

Research and architecture. Agree implementation and release conditions separately.
