08 TRUST INFRASTRUCTURE

Trust Network

Define participation around distinct identities, evidence, obligations and admission conditions.

Research & architecture

Architecture & roadmap

net · EUR · plus VAT where applicable

WHO IT IS FOR

Enterprise architects, governance teams, platform builders and ecosystem partners.

THE QUESTION

A network must keep each participant’s identity, evidence and obligations distinguishable. The Trust Network is presented as staged infrastructure architecture.

WHAT YOU CAN WORK WITH

01

Participant and relationship model.

02

Evidence provenance and participation conditions.

03

Admission, review and withdrawal requirements.

FROM STARTING POINT TO NEXT DECISION

1 Define scope

Identify the subject, organizational context and intended reliance.

→

2 Map authority

Connect evidence and permission to the responsible authority.

→

3 Validate

Validate the bounded runtime before any real issuance or execution.

SCOPE AND NEXT STEP

Research and architecture. Agree implementation and release conditions separately.
