08 TRUST INFRASTRUCTURE

Trusted Capability Marketplace

Design discovery around capability identity, evidence and the permissions needed for use.

Research & architecture

Architecture & roadmap

net · EUR · plus VAT where applicable

WHO IT IS FOR

Enterprise architects, governance teams, platform builders and ecosystem partners.

THE QUESTION

A capability catalogue needs to distinguish what is described, evidenced and actually permitted for use. The marketplace concept keeps those decisions separate.

WHAT YOU CAN WORK WITH

01

Capability and provider identity.

02

Evidence and operating requirements.

03

Separate procurement, authorization and execution steps.

FROM STARTING POINT TO NEXT DECISION

1 Define scope

Identify the subject, organizational context and intended reliance.

→

2 Map authority

Connect evidence and permission to the responsible authority.

→

3 Validate

Validate the bounded runtime before any real issuance or execution.

SCOPE AND NEXT STEP

Research and architecture. Agree implementation and release conditions separately.
